*The Icon Project* - Leslie Sklair 2017-02-27

In the last quarter century, a new form of iconic architecture has appeared throughout the world's major cities. Typically designed by globe-trotting "starchitects" or by a few large transnational architectural firms, these projects are almost always funded by the private sector in the service of private interests. Whereas in the past monumental architecture often had a strong public component, the urban ziggurats of today

are emblems and conduits of capitalist globalization. In *The Icon Project*, Leslie Sklair focuses on ways in which capitalist globalization is produced and represented all over the world, especially in globalizing cities. Sklair traces how the iconic buildings of our era--elaborate shopping malls, spectacular museums, and vast urban megaprojects--constitute the triumphal "Icon Project" of contemporary global capitalism, promoting increasing inequality and hyperconsumerism. Two of the most significant strains of iconic architecture--unique icons recognized as works of art, designed by the likes of Gehry, Foster, Koolhaas, and Hadid, as well as successful, derivative icons that copy elements of the starchitects' work--speak to the centrality of hyperconsumerism within contemporary capitalism. Along with explaining how the architecture industry organizes the social production and marketing of iconic structures, he also shows how corporations increasingly dominate the built environment and promote the trend towards globalizing, consumerist cities. *The Icon Project*, Sklair argues, is a weapon in the struggle to solidify capitalist hegemony as well as reinforce transnational capitalist control of where we live, what we consume, and how we think.

**Urban Modernity in the Contemporary Gulf** - Roberto Fabbri 2021-09-27

*Urban Modernity in the Contemporary Gulf* offers a timely and engaging discussion on architectural production in the modernization era in the Arabian Peninsula. Focusing on the 20th century as a starting point, the book explores the display of transnational architectural practices resulting in different notions of locality, cosmopolitanism, and modernity. Contextually, with an eye on the present, the book reflects on the initiatives that recently re-engaged with the once *ville moderne* which, meanwhile, lost its pivotal function and meaning. A city within a bigger city, the urban fabric produced during the modernization era has the potential to narrate the social growth, East–West dynamics, and citizens' memories of the recent past. Reading obsolescence as an opportunity, the book looks into this topic from a cross-country perspective. It maps, reads and analyses the notion of modern heritage in relation to the contemporary city and looks beyond physical transformations to embrace cultural practices and strategies of urban re-appropriation. It interrogates the value of modern architecture in the non-West, examining how academic

research is expanding the debate on Gulf urbanism, and describes how practices of reuse could foster rethinking neglected areas, also addressing land consumption in the GCC. Presenting a diverse and geographically inclusive authorship, which combines established and up-and-coming researchers in the field, this is an important reference for academics and upper-level students interested in heritage studies, post-colonial urbanism, and architecture in the non-West. *Der globale Minotaurus* - Yanis Varoufakis 2012-11-15

Globalisierung, Gier und fehlende Bankenregulierung – sie alle wurden für die Krise der Weltwirtschaft verantwortlich gemacht. In Wahrheit sind dies nur Nebenschauplätze eines weit größeren Dramas. Eines Dramas, das in der Weltwirtschaftskrise von 1929 wurzelt und bereits seit den 1970er Jahren auf offener Bühne spielt: als die Welt wider besseres Wissen begann, mit ihrem Geld den “Globalen Minotaurus” Amerika zu nähren – so wie einst die Athener dem mythischen Fabeltier auf Kreta Tribut zollten. Heute sind die USA als Stabilisator der Weltwirtschaft selbst nachhaltig geschwächt, und die Konsequenzen des Machtvakuum zeigen sich allerorten. Sie machen vor allem eines klar: Stabilität in der Weltwirtschaft ist nicht umsonst zu haben; sie erfordert historische Entscheidungen – wie nach dem Zweiten Weltkrieg, als die Hegemonialstellung Amerikas begann. Statt hektischer Rettungsaktionen mit immer kürzeren Verfallsdaten ist eine grundlegende Debatte über Stabilitätspolitik, ist ein Neuanfang unvermeidlich.

Das Zeitalter des Überwachungskapitalismus - Shoshana Zuboff 2018-10-04

Gegen den Big-Other-Kapitalismus ist Big Brother harmlos. Die Menschheit steht am Scheideweg, sagt die Harvard-Ökonomin Shoshana Zuboff. Bekommt die Politik die wachsende Macht der High-Tech-Giganten in den Griff? Oder überlassen wir uns der verborgenen Logik des Überwachungskapitalismus? Wie reagieren wir auf die neuen Methoden der Verhaltensauswertung und -manipulation, die unsere Autonomie bedrohen? Akzeptieren wir die neuen Formen sozialer Ungleichheit? Ist Widerstand ohnehin zwecklos? Zuboff bewertet die soziale, politische, ökonomische und technologische Bedeutung der großen Veränderung, die wir erleben. Sie zeichnet ein unmissverständliches Bild der neuen Märkte, auf denen Menschen nur noch Quelle eines kostenlosen Rohstoffs sind - Lieferanten von Verhaltensdaten. Noch haben wir es in der Hand, wie das nächste Kapitel des Kapitalismus aussehen wird. Meistern wir das Digitale oder sind wir seine Sklaven? Es ist unsere Entscheidung! Zuboffs Buch liefert eine neue

Erzählung des Kapitalismus. An ihrer Deutung kommen kritische Geister nicht vorbei.

**Global Construction Data - Stephen Gruneberg 2019-08-12**

Global construction data is vital for contractors, governments, international organisations, policy makers, academic researchers and statisticians. As the global population of the world expands, the sustainability of the built environment raises the political agenda and the need to manage infrastructure and buildings in both urban and rural contexts becomes ever more pressing. How much more can the built environment grow and how can it be managed sustainably? This edited volume addresses how we can find a possible way through the inconsistencies between national construction data sets to devise a consistent approach to national construction data to further the global sustainability agenda and inform policy making. This search begins in Part I, which looks at the methods and definitions used in construction statistics in different countries. Part II considers examples of different types of construction data from the cost of materials, measuring work on high rise buildings and existing stock. In Part III, the authors consider construction data internationally, beginning with the problem of comparing data in different countries using exchange rates and purchasing power parities (PPPs), comparing innovation processes in different countries and looking at the provision of building design internationally. In Part IV, the international theme is continued by comparing accounting practices and company performance in different countries and concludes with an international comparison of construction industries. This book raises awareness of the significance of the construction industry globally and the importance of data to measure it. It informs the discussion of the best ways of handling the consequences of policies affecting the built environment and the effect of the built environment on the rest of the economy and society. It is essential reading for international economists, construction industry consultants, policy makers, construction statisticians and academics.

**Creative Practice Inquiry in Architecture - Ashley Mason 2022-10-03**

This collection introduces, illustrates, and advances fresh ideas about creative practice inquiry in architecture. It concerns architectural knowledge: how architects can use their distinctive skills, habits, and values to advance professional insight, and how such insights can be extended to make wider contributions to society, culture, and scholarship. It shows how architectural ways of knowing and working can be mobilised as tools for research. Collected here are a series of creative practices that emerge out of architecture and actively engage with other fields and methods reaching across the academic

landscape. Architectural inquiries collected in this book probe matters that lie beyond the obvious expectations, the conventions, the default, of the discipline. Drawing, borrowing, adapting, dramatising, perhapsing, monsterring, experimenting, cartooning—the tools and methods of each inquiry vary but they all share a common outward gaze, engaging architectural ways of knowing with other disciplines and practices including the arts, biological sciences, ethnography, and technology. Chapters gathered here offer insight not only into incipient modes and tools of architectural research, but emerging ethical, practical, and philosophical positions intimately tied to the creative practices involved. Setting-out the idea of creative practice inquiry in architecture, this innovative volume offers a lively and resourceful contribution to a growing body of work on design as research. It will be of interest to: students keen to pursue architectural ways of thinking and writing; practitioners who want to use their distinctive professional abilities to contribute to architectural and scholarly knowledge; and academics and doctoral candidates keen to engage with the burgeoning scholarly field of design research.

**Transnational Architecture and Urbanism - Davide Ponzini 2020-05-28**

Transnational Architecture and Urbanism combines urban planning, design, policy, and geography studies to offer place-based and project-oriented insight into relevant case studies of urban transformation in Europe, North America, Asia, and the Middle East. Since the 1990s, increasingly multinational modes of design have arisen, especially concerning prominent buildings and places. Traditional planning and design disciplines have proven to have limited comprehension of, and little grip on, such transformations. Public and scholarly discussions argue that these projects and transformations derive from socioeconomic, political, cultural trends or conditions of globalization. The author suggests that general urban theories are relevant as background, but of limited efficacy when dealing with such context-bound projects and policies. This book critically investigates emerging problematic issues such as the spectacularization of the urban environment, the decontextualization of design practice, and the global circulation of plans and projects. The book portends new conceptualizations, evidence-based explanations, and practical understanding for architects, planners, and policy makers to critically learn from practice, to cope with these transnational issues, and to put better planning in place.

***Introduction to International Political Economy* - David N. Balaam 2018-07-31**

In a revolutionary revision of this best-selling text, David Balaam and Bradford Dillman show how the postwar world order is at once under threat and yet resilient. This classic text surveys the theories,

institutions, and relationships that characterize IPE and highlights them in the context of a diverse range of regional and transnational issues. Introduction to International Political Economy positions students to critically evaluate the global economy and to appreciate the personal impact of political, economic, and social forces. New to the Seventh Edition Streamlined yet comprehensive coverage—reducing the text from 20 to 17 chapters. There is also one unified chapter on global finance and a single chapter on energy and the environment. A new chapter on Constructivism shows sociological and ideational forces at work. A new chapter on Global Production encompasses transnational corporations and labor. A new chapter on Global Health incorporates food and refugee issues. Substantial revisions to 10 chapters, including new material on Brexit, the EU debt and refugee crises, populist-nationalist movements, inequality, trade conflicts and negotiations, cyber weapons, the rise of China, Middle East conflicts, and international responses to climate change. Significant focus throughout on President Trump’s impact on U.S. foreign policy, international order, and global security. Extensive new graphs and tables of data, plus 27 fascinating new text boxes throughout. An author-written Instructor’s Manual and Test Bank are provided along with additional online resources.

Participatory Culture and the Social Value of an Architectural Icon: Sydney Opera House - Cristina Garduno Freeman 2017-09-22

This book develops new and innovative methods for understanding the cultural significance of places such as the World Heritage listed Sydney Opera House. By connecting participatory media, visual culture and social value, Cristina Garduño Freeman contributes to a fast-growing body of scholarship on digital heritage and the popular reception of architecture. In this, her first book, she opens up a fresh perspective on heritage, as well as the ways in which people relate to architecture via participation on social media. Social media sites such as YouTube, Pinterest, Wikipedia, Facebook and Flickr, as well as others, become places for people to express their connections with places, for example, the Sydney Opera House. Garduño Freeman analyses real-world examples, from souvenirs to opera-house-shaped cakes, and untangles the tangible and intangible ways in which the significance of heritage is created, disseminated and maintained. As people’s encounters with World Heritage become increasingly mediated by the digital sphere there is a growing imperative for academics, professionals and policy-makers to understand the social value of significant places. This book is beneficial to academics, students and professionals of architecture.

**Moderne Architektur seit 1900 - William J. R. Curtis 2002-01**

**About Star Architecture - Nadia Alaily-Mattar 2020-03-16**

Cities across the world have been resorting to star architects to brand their projects, spark urban regeneration and market the city image internationally. This book shifts the attention from star architects to star architecture, arguing that the process of deciding about and implementing relevant architectural and urban projects is not the product of any single actor. Star architecture can, in fact, be better studied and understood as assembled by multiple actors and in its relationship with urban transformation. In its 18 chapters, the book presents a multidisciplinary collection of expert contributions in the fields of urban planning, architecture, media studies, urban economics, geography, and sociology, consistently brought together for the first time to deal with this topic. Through a vast array of case studies and analytical techniques touching over 20 cities in Europe, the book shows the positive and more problematic impacts of star architecture with reference to the preservation of built heritage, tourism and media. The book will be of interest to architects, sociologists, urban planners, and public administrators.

Designing Emerging Markets - Giaime Botti 2023-05-22

This book offers a unique glance into the process of globalisation of the architectural practice during the last three decades through the lenses of innovative methodologies in architectural history based on quantitative data. Focusing on the golden age of globalisation (1990-2019), it investigates the transnational work of more than one thousand architectural firms of different business models from Europe, North America, and the Asia-Pacific in a broad sample of emerging markets: Mainland China, South-East Asia, India, the Persian Gulf, Sub-Saharan Africa, Russia and Kazakhstan, and Latin America. In the book, different thematic geographies are presented to explore the global scope of the contemporary profession, examine significant projects and the structural conditions behind them, and reveal the debates that such works generated. Understanding the global agency of design firms in emerging markets also becomes a way to study different market conditions, modes of production, and architectural trends comparatively and to highlight the shifts that occurred in the profession over the last few decades. The use of quantitative methodologies produces a novel and updated narrative on contemporary architecture in emerging markets grounded in quantitative data rather than in preassumptions and purely qualitative interpretations. Richly illustrated, this book is further enhanced by an ample set of maps, graphs, and

tables to visualise data better.

**Architecture as a Global System - Peter Raisbeck 2019-11-08**

This book provides a clear-sighted analysis which suggests that architectural design may yet shape and order the future of cities. A clear argument that emerges is that to retain their future agency, architects must understand the contours and ecologies of practice that constitute the global system of architectural production.

**Global Shanghai Remade - Richard Hu 2019-10-08**

Examining the rise of Pudong and its role in re-creating Shanghai as a global city, *Global Shanghai Remade* utilises this important case study to shed light on contemporary globalisation and China's integration with the world since the late 20th century. Unpacking the rise of Pudong in the context of Deng Xiaoping's nation-building agenda, this book explores the development of the district from its earliest planning into a global city centre through multiple perspectives. In doing so, it explores the role of key decision-makers and actors, the strategic planning process, the approaches to urban development, and some of the iconic projects that define the rise of Pudong, Shanghai, and China itself. A timely volume for the 30th anniversary of China's strategy of 'developing and opening Pudong,' it combines the analyses and findings from these perspectives into a framework for a broader understanding of city-making with Chinese characteristics. The first study of its kind, providing a comprehensive and systematic examination of Pudong, this book will be useful for students and scholars of urban planning and design, as well as Chinese Studies and Development Studies more generally.

***Why Cities Look the Way They Do* - Richard J. Williams 2019-08-08**

We tend to think cities look the way they do because of the conscious work of architects, planners and builders. But what if the look of cities had less to do with design, and more to do with social, cultural, financial and political processes, and the way ordinary citizens interact with them? What if the city is a process as much as a design? Richard J. Williams takes the moment construction is finished as a beginning, tracing the myriad processes that produce the look of the contemporary global city. This book is the story of dramatic but unforeseen urban sights: how financial capital spawns empty towering skyscrapers and hollowed-out ghettos; how the zoning of once-illicit sexual practices in marginal areas of the city results in the reinvention of culturally vibrant gay villages; how abandoned factories have been repurposed as creative hubs in a precarious postindustrial economy. It is also the story of how popular

urban clichés and the fictional portrayal of cities powerfully shape the way we read and see the bricks, concrete and glass that surround us. Thought-provoking and original, *Why Cities Look the Way They Do* will appeal to anyone who wants to understand the contemporary city, shedding new light on humanity's greatest collective invention.

Practiceopolis: Stories from the Architectural Profession - Yasser Megahed 2020-07-30

This is a graphic novel about the contemporary architectural profession, in which it acts as the protagonist in the form of an imaginary city called Practiceopolis. The novel narrates quasi-realistic stories that exaggerate the architectural everyday and the tacit, in order to make them prominent and tangible. They depict and dramatise the value conflicts between the different cultures of practising architecture and between the architectural profession and other members of the building industry as political conflicts around the future of Practiceopolis. The book uses the metaphorical world of Practiceopolis to provoke big questions about everyday routines in the profession that practitioners may take for granted and to examine different ideologies at work among architects and other members of the construction industry. The novel ends in the tradition of dystopian worlds common in a certain strand of graphic novels. By vividly illustrating and narrating the critical issues he interrogates, the author has created a world which any architect, student or professional, will both instantly recognise and simultaneously reject, provoking the reader to challenge themselves and the profession at large.

Vertikales Bauen in Europa - Andrea Glauser 2018-06-07

In den letzten zwei Jahrzehnten sind weltweit so viele Hochhäuser gebaut worden wie nie zuvor. Auch in Europa, wo lange Zeit vor allem Kirchtürme und Schornsteine vertikale Akzente setzten, prägen sie vermehrt das Gesicht der Städte. Die neuere monumentale Architektur ist mit vielfältigen Versprechen, Begehrlichkeiten und Befürchtungen verknüpft. Am Beispiel von Paris, London und Wien diskutiert diese Studie, welche Vorstellungen von Urbanität dabei im Spiel sind. Sie verortet das vertikale Bauen im Spannungsfeld von globalisierten Vergleichshorizonten einerseits und städtischem Eigensinn andererseits.

*Transnationale Karrieren* - Florian Kreutzer 2007-10-11

FlugbegleiterInnen und RentnerInnen, BörsenmaklerInnen und UnternehmerInnen untersucht. Dabei geht es um die zentrale Frage, wie diese Männer und Frauen durch ihre internationalen Karrieren zur Konstitution transnationaler sozialer Räume, Gemeinschaften und Klassen beitragen. A number of methods are used for cost estimation, including rough estimates, semi-detailed estimates, or detailed estimates, depending on the needs for the estimates<sup>[1]</sup>[2]. Key concepts in this field include overhead costs, cost driver identification, cost allocation methods, capital budgeting, flexible budgeting, zero-based budgeting, budgets, and estimates.
