Contract Management Body of Knowledge® - National Contract Management Association
2023-01-07

A must-have reference for contract management professionals, the CMBOK presents what should be learned by contract managers and how they should learn it. The content was developed through a voluntary consensus process governed and administered by NCMA to promote the fair development of consensus. This consensus was established through a job task analysis survey of contract managers and working groups comprised of subject matter experts in contract management. The CMBOK is not solely for the benefit of contract managers; contract managers are not the only ones involved in contract

management activities. Numerous stakeholders measure success or failure by contract performance. Knowledge of contract management and competent contract management processes directly impacts the success of contract performance. The seventh edition of the CMBOK is primarily driven by the changes to the Contract Management Standard™ (CMS™). In June 2022, the American National Standards Institute (ANSI) reaffirmed the NCMA CMS™ as an American National Standard (ANS). This ANS [ANSI/NCMA ASD 1-2019 (R2022)—see Annex] serves as the CMBOK's foundational document to expand, refine, and reorganize contract management knowledge. The CMBOK provides further definition of the field of contract management; the framework for the body of knowledge; and the practices, lexicon, and processes of contract management. In addition, it provides procedural steps for contract management processes in general, as well as for specialized areas, including government or commercial contracting.

fester Bestandteil der Organisationsgestaltung. Das vorliegende Buch liefert nicht nur Erläuterungen, „was“ in den vorgestellten Facetten des Prozessmanagements getan werden soll, sondern auch konkrete Schritte, Empfehlungen und Beispiele, „wie“ es effektiv und effizient umgesetzt werden kann. Im Buch sind Erfahrungen aus vielen Praxisjahren festgehalten, die es zu einem nützlichen Hilfsmittel und Impulsgeber machen. Die Autoren liefern Antworten auf Fragen, wie bspw. „Wie erstelle ich eine gute Prozesslandkarte?“, „Wie identifiziere und etabliere ich die Prozessverantwortung für einen Prozess?“, „Wie integriere ich Compliance-Anforderungen in das Prozessmanagement?“ oder „Wie ermittle ich den Personalbedarf für einen bestimmten Prozess?“. Über diese Gestaltungsfragen hinaus ist das Prozessmanagement heute in den Führungsebenen als Managementansatz angekommen. Auch in diesem Umfeld liefert das Werk einen hilfreichen Beitrag. Es zeigt, wie das Prozessmanagement mit anderen etablierten Managementansätzen zu einem sinnvollen Ganzen für eine umsichtige Planung, Umsetzung und Steuerung integriert werden kann. Die vorgestellten Themen sind insbesondere für Unternehmen bzw. Organisationen interessant, die in Bezug auf ihren umgesetzten Prozessmanagement-Ansatz einen mittleren bis höheren Reifegrad besitzen. Das Buch wurde mit der Zielsetzung zum Einsatz in der unternehmerischen Praxis geschrieben. Es kann darüber hinaus auch in der anwendungsorientierten Ausbildung zum Thema Prozessmanagement eingesetzt werden.

Exploring the Professional Identity of Management Consultants - Anthony F. Buono 2013-03-01

The volume is based on the presentations and discussions from the Fifth European Conference on Management Consulting sponsored by the Management Consulting Division of the Academy of Management, which took place June, 2011 at Vrije Universiteit in Amsterdam, the Netherlands. The conference theme - Exploring the Professional Identity of Management Consultants - attempted to capture the highly ambiguous social status of this young and emerging profession. Management consulting does not have professional standards or accreditation criteria like those found in medicine or law, there are low barriers to entry, and a broad range of tasks are undertaken in the name of consulting. As a result, a crucial aspect of what constitutes such a loosely defined profession is the identity of its members. The professional identity of management consultants is continuously developing through the interplay of how consultants are seen and valued by clients as well as in the larger society, and how consultancy firms and consultants identify and position themselves. This theme includes a variety of topics, ranging from the interaction between consultants and their clients, consultant rhetoric and self-presentation, and the plethora of books, media and public discourse on consulting, to human resource policies and practices, knowledge development activities of consultancy firms, career and life stories of consultants and consultancies, and consulting associations, accreditation bodies, and education programs. All of these factors contribute, either directly or indirectly, to identity construction in the field of management consulting.

New Suits - Michele DeStefano 2019-06-15

"Time to Leave Law-Land ... and Head Back Into the Jungle" Fuelled by advancing technology, new business models, and altered client expectations, the legal industry faces unprecedented change across its entire value chain. Unfortunately, many legal professionals fear the technology train and the convergence of other fields with law. They see legaltech, AI, and bots like "lions and tigers and bears oh my." We (the curators and authors of this book) see opportunity. Although the future may require us to put on "new suits"—it represents an enormous opportunity for lawyers to reinvent ourselves for our own and our clients' benefit. Filled with chapters written by experts in the intersection of law, innovation, and technology, this book provides a global perspective on the diverse legal service delivery ecosystem that will be our future. It provides chapter upon chapter (reason upon reason) explaining why lawyers can and should increase their appetite for disruption in the legal world. So welcome to the jungle and enjoy the ride as we attempt to systematically map the uncharted waters of the future legal realm and simultaneously inspire you to build a new future in law. Endorsements "The 'Artist Formerly Known as the Legal Profession' isn't what it used to be. You think that you know law firms and the challenges that confront lawyers, but you don't. Legal services providers have spent years resisting change, and now seem determined to pack fifty- or sixty-years of evolution into five. The entire legal services market has been transformed by LegalTech, globalization, and new delivery models - and until now there has been no guide to the way that consumers can benefit and providers can profit from the changes. Guenther and Michele have gathered a Who's Who of thinkers to provide a marvellous range of visions of the way that law is changing. They provide a roadmap for the future of law - if only you'll follow it." Professor Dan Hunter PhD FAAL, Foundation Dean, Swinburne Law School "Nomen est omen' if you read the book title of 'New Suits'. It encourages, allows and requests lawyers at all levels to rethink their former and existing ways of doing business in many areas of law. In the same, it outlines great opportunities to a new breed of experts in our profession. Thanks to the various authors, one gets a good understanding of how massive the impact of technology has become - and is going to be - to the legal services market. And the authors provide a distinct view of how a rather traditional profession will have to transform their business models to comply with the fast changes in the marketplace." Jürg Birri, Partner / Global Head of KPMG's Legal "For a while now, we have been hearing about digitization, disruption and new delivery models in the world of Big Law. "New Suits" both reassures and gives a wake-up call to all of us in the business of providing legal services. Setting out both the opportunities and the threats engendered by the dynamic change in our industry, the book is an invaluable guide to all lawyers and legal business professionals wanting some insight on the challenges facing them in a globalized and accelerating world." Dr Mattias Lichtblau, CMS "This book comes at a time where we see just the beginning of a transformational change on the legal market. While such transformation is seen as a great opportunity for those participants who endorse change and innovations, others seem to be more frightened by potential disruption of their well-established business models. The structure and comprehensive contributor listing for this book encapsulates many disparate challenges faced by almost all players on the market. The lecture of the book should give good guidance to anyone who is interested in how the legal profession is (finally) modernizing, capitalizing on technology trends and becoming more client-centric.

Specifically, the book addresses: Causes of bad data quality, bad data quality impacts, and importance of data quality to justify the case for data quality Butterfly effect of data quality A detailed description of data quality dimensions and their measurement Data quality strategy approach Six Sigma - DMAIC approach to data quality Data quality management techniques Data quality in relation to data initiatives like data migration, MDM, data governance, etc. Data quality myths, challenges, and critical success factors Students, academicians, professionals, and researchers can all use the content in this book to further their knowledge and get guidance on their own specific projects. It balances technical details (for example, SQL statements, relational database components, data quality dimensions measurements) and higher-level qualitative discussions (cost of data quality, data quality strategy, data quality maturity, the case made for data quality, and so on) with case studies, illustrations, and real-world examples throughout. About the Author Rupa Mahanti, Ph.D. is a Business and Information Management consultant and has worked in different solution environments and industry sectors in the United States, United Kingdom, India, and Australia. She helps clients with activities such as business process mapping, information management, data quality, and strategy. Having a work experience (academic, industry, and research) of more than a decade and half, Rupa has guided a doctoral dissertation and published a large number of research articles. She is an associate editor with the journal Software Quality Professional and a reviewer for several international journals. "This is not the kind of book that you'll read one time and be done with. So scan it quickly the first time through to get an idea of its breadth. Then dig in on one topic of special importance to your work. Finally, use it as a reference to guide your next steps, learn details, and broaden your perspective." from the foreword by Thomas C. Redman, Ph.D., the Data Doc Dr. Mahanti provides a very detailed and thorough coverage of all aspects of data quality management that would suit all ranges of expertise from a beginner to an advanced practitioner. With plenty of examples, diagrams, etc. the book is easy to follow and will deepen your knowledge in the data domain. I will certainly keep this handy as my go-to reference. I can't imagine the level of effort and passion that Dr. Mahanti has put into this book that captures so much knowledge and experience for the benefit of the reader. I would highly recommend this book for its comprehensiveness, depth, and detail. A must-have for a data practitioner at any level. Clint D'Souza, CEO and Director, CDZM Consulting

Transdisciplinary Engineering: A Paradigm Shift - C.-H. Chen 2017-07-20

Concurrent Engineering is based on the concept that different phases of a product life cycle should be conducted concurrently and initiated as early as possible within the Product Creation Process (PCP). Its main goal is to increase the efficiency and effectiveness of the PCP and reduce errors in the later

stages, and to incorporate considerations for the full lifecycle, through-life operations, and environmental issues of the product. It has become the substantive basic methodology in many industries, and the initial basic concepts have matured and become the foundation of many new ideas, methodologies, initiatives, approaches and tools. This book presents the proceedings of the 24th ISPE Inc. International Conference on Transdisciplinary (formerly: Concurrent) Engineering (TE 2017), held in Singapore, in July 2017. The 120 peer-reviewed papers in the book are divided into 16 sections: air transport and traffic operations and management; risk-aware supply chain intelligence; product innovation and marketing management; human factors in design; human engineering; design methods and tools; decision supporting tools and methods; concurrent engineering; knowledge-based engineering; collaborative engineering; engineering for sustainability; service design; digital manufacturing; design automation; artificial intelligence and data analytics; smart systems and the Internet of Things. The book provides a comprehensive overview of recent advances in transdisciplinary concurrent engineering research and applications, and will be of interest to researchers, design practitioners and educators working in the field.
