Translational Speech-Language Pathology and Audiology - Robert Goldfarb 2012-04-05

Design for the Changing Educational Landscape - Andrew Harrison 2013-10-15

The whole landscape of space use is undergoing a radical transformation. In the workplace a period of unprecedented change has created a mix of responses with one overriding outcome observable worldwide: the rise of distributed space. In the learning environment the social, political, economic and technological changes responsible for this shift have been further compounded by constantly developing theories of learning and teaching, and a wide acceptance of the importance of learning as the core of the community, resulting in the blending of all aspects of learning into one seamless experience. This book attempts to look at all the forces driving the provision and pedagogic performance of the many spaces, real and virtual, that now accommodate the experience of learning and provide pointers towards the creation and design of learning-centred communities. Part 1 looks at the entire learning universe as it now stands, tracks the way in which its constituent parts came to occupy their role, assesses how they have responded to a complex of drivers and gauges their success in dealing with renewed pressures to perform. It shows that what is required is innovation within the spaces and integration between them. Part 2 finds many examples of innovation in evidence across the world - in schools, the higher and further education campus and in business and cultural spaces - but an almost total absence of integration. Part 3 offers a model that redefines the learning landscape in terms of learning outcomes, mapping spatial requirements and activities into a detailed mechanism that will achieve the best outcome at the most appropriate scale. By encouraging stakeholders to creating an events-based rather than space-based identity, the book hopes to point the way to a fully-integrated learning landscape: a learning community.

Nature's Music - Peter R. Marler 2004-10-05

The voices of birds have always been a source of fascination. Nature's Music brings together some of the world's experts on birdsong, to review the advances that have taken place in our understanding of how and why birds sing, what their songs and calls mean, and how they have evolved. All contributors have strived to speak, not only to fellow experts, but also to the general reader. The result is a book of readable science, richly illustrated with recordings and pictures of the sounds of birds. Bird song is much more than just one behaviour of a single, particular group of organisms. It is a model for the study of a wide variety of animal behaviour systems, ecological, evolutionary and neurobiological. Bird song

sits at the intersection of breeding, social and cognitive behaviour and ecology. As such interest in this book will extend far beyond the purely ornithological - to behavioural ecologists psychologists and neurobiologists of all kinds. * The scoop on local dialects in birdsong * How birdsongs are used for fighting and flirting * The writers are all international authorities on their subject

Beer Places - Daina Cheyenne Harvey 2023-03-06

Beer Places is, most essentially, a road map for craft beer, taking readers to various locales to discover the beverage’s deep connections to place. At another level, *Beer Places* is an academic analysis of these geographical ties. Collected into sections that address authenticity and revitalization, politics and economics, and collectivity and collaboration, this book blends new research with a series of “postcards”: informal conversations and first-person dispatches from the field that transport readers to the spots where pints are shared, networks forged, and spaces defined. With insight from social scientists, beer bloggers, travel writers, and food entrepreneurs who recount their experiences of taprooms, breweries, and bottle shops from North Carolina to Zimbabwe, *Beer Places* reveals differences in the craft beer scene across multiple geographies. Situating craft beer as an emerging and important component of food studies, the essays in this volume attest to the singular power of craft beer to connect people and places.

Quality Assurance in the Pathology Laboratory - Maciej J. Bogusz 2011-02-22

Beaks, Bones and Bird Songs - Roger Lederer 2016-06-22

“Reveals the strange and wondrous adaptations birds rely on to get by.” —National Audubon Society When we see a bird flying from branch to branch happily chirping, it is easy to imagine they lead a simple life of freedom, flight, and feathers. What we don’t see is the arduous, life-threatening challenges they face at every moment. *Beaks, Bones, and Bird Songs* guides the reader through the myriad, and often almost miraculous, things that birds do every day to merely stay alive. Like the goldfinch, which manages extreme weather changes by doubling the density of its plumage in winter.

Or urban birds, which navigate traffic through a keen understanding of posted speed limits. In engaging and accessible prose, Roger Lederer shares how and why birds use their sensory abilities to see ultraviolet, find food without seeing it, fly thousands of miles without stopping, change their songs in noisy cities, navigate by smell, and much more.

All the Gold Stars - Rainesford Stauffer 2023-06-06

From journalist and author of *An Ordinary Age*, an examination, dismantling, and reconstruction of ambition, where burnout is the symptom of our holiest sin: the lonely way we strive. Ambition—the want, the hunger, the need to achieve—is woven into America’s fabric from the first colonization to capitalism. From our first gold star assignment to acceptance at the “right” college to hustle and grinding our lives, we celebrate our drive, even as we gatekeep who is permitted to strive—and how visibly. Even as we burn out. When we can’t even. When we know: work won’t love us back. *All the Gold Stars* looks at how the cultural, personal, and societal expectations around ambition are driving the burnout epidemic by funneling our worth into productivity, limiting our imaginations, and pushing us further apart. Through the devastating personal narrative of her own ambition crisis, Stauffer discovers the common factors driving us all, peeling back layers of family expectations, capitalism, and self-esteem that dangerously tie up our worth in our output. Interviews with students, parents, workers, psychologists, labor organizers, and more offer a new definition of ambition and the tools to reframe our lives around true success. *All the Gold Stars* provides ways for us to reject our current reality and reconceive ambition as more collective, imaginative, and rooted in caring for ourselves and each other.

Birdsongs on Mars - Jon Glover 2020-08-27

The teasing title poem of this book is about weather. Rain falls, wind cracks its cheeks as in *Macbeth*; the noises are drops like kisses falling, 'fallen into birdsong on Mars'. What would it sound like, be like, to hear it? The poem wants to know what it can't yet know. But as the book proceeds, the poet - on a human heath, tormented by loss - hears something like it, unearthly sounds on a planet without atmosphere, sound making quite another kind of sense. Jon Glover wrote most of the poems in this collection before his wife's sudden death from cancer in 2019. He developed the themes and fragmenting style of his previous book, *Glass is Elastic* (2012), where language was always quizzing itself and how it might relate to the actual and the historical world. Intense, playful, unpredictable, the poems surprised. Here, in the disturbing environments of Upstate New York, Calgary Bay or his Bolton front room the poet confronts illness (his own), hospitals (his visits) and wonderful ambulances (his transports). He resists attempts to see hints or destinies. Then bereavement throws up an actuality of a different order. The collection ends with a mock-sonnet sequence, written during the pandemic, in which the poet tries all the doors and windows to find her, to speak with her - love poems where love has not changed but its circumstances have. 'Will I want ever to get out of this place - the past of the poems in this book?' the poet asks. There are no answers, yet.

Is Birdsong Music? - Hollis Taylor 2017-05-01

“A ground-breaking study of the songs of the pied butcherbird . . . intellectually engaging and also very entertaining as a fieldwork memoir.” —The Music Trust How and when does music become possible? Is it a matter of biology, or culture, or an interaction between the two? Revolutionizing the way we think about the core values of music and human exceptionalism, Hollis Taylor takes us on an outback road trip to meet the Australian pied butcherbird. Recognized for their distinct timbre, calls, and songs, both sexes of this songbird sing in duos, trios, and even larger choirs, transforming their flute-like songs annually. While birdsong has long inspired artists, writers, musicians, and philosophers, and enthralled listeners from all walks of life, researchers from the sciences have dominated its study. As a field musicologist, Taylor spends months each year in the Australian outback recording the songs of the pied butcherbird and chronicling their musical activities. She argues persuasively in these pages that their inventiveness in song surpasses biological necessity, compelling us to question the foundations of music and confront the remarkably entangled relationship between human and animal worlds. Equal parts nature essay, memoir, and scholarship, *Is Birdsong Music?* offers vivid portraits of the extreme locations where these avian choristers are found, quirky stories from the field, and an in-depth exploration of the vocalizations of the pied butcherbird. “Hollis Taylor has given us one of the most serious books ever written on animal music. *Is Birdsong Music?* is so engaging that all who care about humanity’s place on Earth should read it. We are certainly not the only musicians on this planet.”

—David Rothenberg, author of *Why Birds Sing*

Secret Life of the City - Hanna Hagen Bjørgaas 2023-04-25

Come along on an informative, whirlwind tour of urban species—from intelligent crows to backyard lichens—and discover that you are surrounded by wild nature, even in your own backyard. When biologist Hanna Bjørgaas spots a fairy cup lichen in Antarctica, she is surprised to recognize it from her own backyard in Oslo. When she returns home, she embarks on a journey into urban nature, visiting city parks, cemeteries, and concrete rooftops to investigate the species that live in urban spaces. Along the way, she meets corvids, songbirds, ants, pigeons, bats, sparrows, fungi, and linden trees—and the experts who study their surprising abilities to survive, and thrive, in the city. As Bjørgaas discovers,

urban nature—and its unique mixture of species that have never lived together before in Earth's history—is valuable. More than half of the world's human population lives in densely populated areas—and plants and animals have followed us into cities. *Secret Life of the City* invites us to pay more attention to the sounds, sights, and smells of urban nature right outside our door. A treasure trove of fascinating flora and fauna, this wonderful book offers a plea to save our city plants, animals, and fungi before we lose them, too.

Second Language Acquisition and the Critical Period Hypothesis - David Birdsong 1999-01-01

In language learning, the rule of thumb is: the earlier the better. Children exposed to language from birth are uniformly successful in first language acquisition (L1A), whereas those deprived of contact with language during childhood are pathologically deficient. In second language acquisition (L2A), the difficulty of learning after puberty is routinely attested anecdotally and has been the subject of numerous scientific studies. It is widely believed that age effects in both are developmental in nature. Native levels of attainment in L1A and L2A are thought to be possible only if learning began before the closure of a "window of opportunity"--a critical or sensitive period. Increasingly, this popular wisdom is being called into question. Triggering this reevaluation is evidence that some late-starting learners achieve native-like competence in a second language and evidence of age effects past the presumed closure of the window of opportunity for learning. As the debate takes shape, some of the most renowned researchers in the field are weighing in on the issue. Their thoughts and evidence are presented in this volume. The chapters approach the Critical Period Hypothesis (CPH) from diverse perspectives and are evenly balanced in favor of and against the CPH-L2A. Each of the contributors brings authority and an international reputation to the question. As the papers encompass many domains of inquiry in L2A--syntax, morphology, phonetics/phonology, Universal Grammar, and neurofunctional factors in language--this volume should appeal to a wide audience of researchers and advanced students.

Input Matters in SLA - Thorsten Piske 2009

This volume bridges the gap between theory and practice by bringing together well-known and new authors to discuss a topic of mutual interest to second language researchers and teachers alike: input. Reader-friendly chapters offer a range of existing and new perspectives on input in morphology, syntax, phonetics and phonology.
