New Suits - Michele DeStefano 2019-06-15

"Time to Leave Law-Law Land ... and Head Back Into the Jungle" Fuelled by advancing technology, new business models, and altered client expectations, the legal industry faces

unprecedented change across its entire value chain. Unfortunately, many legal professionals fear the technology train and the convergence of other fields with law. They see legaltech, AI, and bots like "lions and tigers and bears oh my." We (the curators and authors of this book) see opportunity. Although the future may require us to put on "new suits"—it represents an enormous opportunity for lawyers to reinvent ourselves for our own and our clients' benefit. Filled with chapters written by experts in the intersection of law, innovation, and technology, this book provides a global perspective on the diverse legal service delivery ecosystem that will be our future. It provides chapter upon chapter (reason upon reason) explaining why lawyers can and should increase their appetite for disruption in the legal world. So welcome to the jungle and enjoy the ride as we attempt to systematically map the uncharted waters of the future legal realm and simultaneously inspire you to build a new future in law.

Endorsements "The 'Artist Formerly Known as the Legal Profession' isn't what it used to be. You think that you know law firms and the challenges that confront lawyers, but you don't. Legal services providers have spent years resisting change, and now seem determined to pack fifty- or sixty-years of evolution into five. The entire legal services market has been transformed by LegalTech, globalization, and new delivery models - and until now there has been no guide to the way that consumers can benefit and providers can profit from the changes. Guenther and Michele have gathered a Who's Who of thinkers to provide a marvellous range of visions of the way that law is changing. They provide a roadmap for the future of law - if only you'll follow it." Professor Dan Hunter PhD FAAL, Foundation Dean, Swinburne Law School "'Nomen est omen' if you read the book title of 'New Suits'. It encourages, allows and requests lawyers at all levels to rethink their former and existing ways of doing business in many areas of law. In the same, it outlines great opportunities to a new breed of experts in our profession. Thanks to the various authors, one gets a good understanding of how massive the impact of technology has become - and is going to be - to the legal services market. And the authors provide a distinct view of how a rather traditional profession will have to transform their business models to comply with the fast changes in the marketplace." Jürg Birri, Partner / Global Head of KPMG's Legal "For a while now, we have been hearing about digitization, disruption and new delivery models in the world of Big Law. "New Suits" both reassures and gives a wake-up call to all of us in the business of providing legal services. Setting out both the opportunities and the threats engendered by the dynamic change in our industry, the book is an invaluable guide to all lawyers and legal business professionals wanting some insight on the challenges facing them in a globalized and accelerating world." Dr Mattias Lichtblau, CMS "This book comes at a time where we see just the beginning of a transformational change on the legal market. While such transformation is seen as a great opportunity for those participants who endorse change and innovations, others seem to be more frightened by potential disruption of their well-established business models. The structure and comprehensive contributor listing for this book encapsulates many disparate challenges faced by almost all players on the market. The lecture of the book should give good guidance to anyone who is interested in how the legal profession is (finally) modernizing, capitalizing on technology trends and becoming more client-centric.

Contract Management Body of Knowledge® - National Contract Management Association

2023-01-07

A must-have reference for contract management professionals, the CMBOK presents what should be learned by contract managers and how they should learn it. The content was developed through a voluntary consensus process governed and administered by NCMA to promote the fair development of consensus. This consensus was established through a job task analysis survey of contract managers and working groups comprised of subject matter experts in contract management. The CMBOK is not solely for the benefit of contract managers; contract managers are not the only ones involved in contract management activities. Numerous stakeholders measure success or failure by contract performance. Knowledge of contract management and competent contract management processes directly impacts the success of contract performance. The seventh edition of the CMBOK is primarily driven by the changes to the Contract Management Standard™ (CMS™). In June 2022, the American National Standards Institute (ANSI) reaffirmed the NCMA CMS™ as an American National Standard (ANS). This ANS [ANSI/NCMA ASD 1-2019 (R2022)—see Annex] serves as the CMBOK's foundational document to expand, refine, and reorganize contract management knowledge. The CMBOK provides further definition of the field of contract management; the framework for the body of knowledge; and the practices, lexicon, and processes of contract management. In addition, it provides procedural steps for contract management processes in general, as well as for specialized areas, including government or commercial contracting.

Exploring the Professional Identity of Management Consultants - Anthony F. Buono
2013-03-01

The volume is based on the presentations and discussions from the Fifth European Conference on Management Consulting sponsored by the Management Consulting Division of the Academy of Management, which took place June, 2011 at Vrije Universiteit in Amsterdam, the Netherlands. The conference theme - Exploring the Professional Identity of Management Consultants - attempted to capture the highly ambiguous social status of this young and emerging profession. Management consulting does not have professional standards or accreditation criteria like those found in medicine or law, there are low barriers to entry, and a broad range of tasks are undertaken in the name of consulting. As a result, a crucial aspect of what constitutes such a loosely defined profession is the identity of its members. The professional identity of management consultants is continuously developing through the interplay of how consultants are seen and valued by clients as well as in the larger society, and how consultancy firms and consultants identify and position themselves. This theme includes a variety of topics, ranging from the interaction between consultants and their clients, consultant rhetoric and self-presentation, and the plethora of books, media and public discourse on consulting, to human resource policies and practices, knowledge development activities of consultancy firms, career and life stories of consultants and consultancies, and consulting associations, accreditation bodies, and education programs. All of these factors contribute, either directly or indirectly, to identity construction in the field of management consulting.

Engineering Economics of Life Cycle Cost Analysis - John Vail Farr 2023-06-30

It presents advanced costing techniques such as simulation-based costing, decision and risk analysis, complex systems costing, software, big data, and cloud computing estimation. Examples and problems demonstrating these techniques with real-world applications are also included. All engineers and similar professionals will find this book useful, but it is mainly written for systems engineers, engineering managers, program/product managers, and industrial engineers. Transdisciplinary Engineering: A Paradigm Shift - C.-H. Chen 2017-07-20

Concurrent Engineering is based on the concept that different phases of a product life cycle should be conducted concurrently and initiated as early as possible within the Product Creation Process (PCP). Its main goal is to increase the efficiency and effectiveness of the PCP and reduce errors in the later stages, and to incorporate considerations for the full lifecycle, through-life operations, and environmental issues of the product. It has become the substantive basic methodology in many industries, and the initial basic concepts have matured and become the foundation of many new ideas, methodologies, initiatives, approaches and tools. This book presents the proceedings of the 24th ISPE Inc. International Conference on Transdisciplinary (formerly: Concurrent) Engineering (TE 2017), held in Singapore, in July 2017. The 120 peer-reviewed papers in the book are divided into 16 sections: air transport and traffic operations and management; risk-aware supply chain intelligence; product innovation and marketing management; human factors in design; human engineering; design methods and tools; decision supporting tools and methods; concurrent engineering; knowledge-based engineering; collaborative engineering; engineering for sustainability; service design; digital manufacturing; design automation; artificial intelligence and data analytics; smart systems and the Internet of Things. The book provides a comprehensive overview of recent advances in transdisciplinary concurrent engineering research and applications, and will be of interest to researchers, design practitioners and educators working in the field.
